PROFESSIONAL SUMMARY

Software engineer with a strong foundation in Java, Spring Boot, and full-stack web development. Experienced in building scalable, user-focused applications, including *ExpensSage*—a full-featured expense-sharing app inspired by Splitwise. Quick learner with a growing interest in mobile development and experience using Kotlin. Passionate about simplifying complex problems through clean architecture and intuitive design.

EDUCATION

University of New Mexico, Albuquerque, NM

Bachelor of Science in Computer Science | Minor in Mathematics

Aug 2021 – May 2025

GPA: 3.52/4.0

Relevant Coursework: Database Management (SQL, NoSQL) | Software Engineering | AI/ML | Operating Systems | NLP | Computer Networks
Cloud Computing | Data Structures & Algorithms

TECHNICAL SKILLS

Frontend: JavaScript, React, HTML5, CSS3, Tailwind, Bootstrap, Responsive Design, Accessibility (a11y)

Backend: Node.js, Express.js, RESTful APIs, Vue, Next.js

Databases: PostgreSQL, MongoDB

Tools & DevOps: Git, GitHub, Heroku, Railway, Postman, Mailgun API

Languages: C#, JavaScript, Python, Java, C, C++

Personal: Quick Learner, Problem Solver, Teamwork Oriented, Effective Communicator, Team Management Experience, Critical Thinker

KEY PROJECTS & TECHNICAL EXPERIENCE

ExpensSage – Full-Stack Expense Sharing App ([Live Demo](#))

02/2025 – Present

- Developed a full-featured expense management app to track, split, and simplify shared expenses among friends, groups, and roommates
- Implemented secure JWT authentication, group/friend management, and advanced split types (equal, exact, percentage, shares)
- Integrated OCR using Google Cloud Vision API and AI parsing via Gemini (Vertex AI) for receipt scanning and auto-suggestion of expense details
- Built with Spring Boot (Java 17), React, TypeScript, PostgreSQL (Supabase), and deployed backend on Oracle Cloud with Cloudflare R2 for storage
- Designed as a Progressive Web App (PWA) with offline support, push notifications, and mobile installation for a native-like experience

My Apps – Cloud Based Authentication System ([Live Demo](#))

11/2024 – Present

- Built a centralized dashboard to manage multiple applications with shared authentication.
- Integrated Mailgun API for email verification and domain configuration.
- Migrated infrastructure from Heroku to Railway and refactored MongoDB-based routes to PostgreSQL.

Groceries List Manager – Full-Stack App ([Live Demo](#))

6/2024 – Present

- Built a live groceries list application with user authentication and live data updates.
- Emphasized usability and design accessibility to support efficient list building and sharing.
- Deployed using Railway and configured CI for future scalability.

Auction House – Scalable Web Platform

3/2024 – 4/2024

- Led a 3-member team to develop a terminal-based auction system with server-client architecture.
- Built core features including item listing, bidding, and transaction closure.
- Developed a user-friendly UI using HTML, CSS, and JavaScript.

WORK EXPERIENCE

University of New Mexico, UNM, Albuquerque, NM

Feb 2022 - Present

Annex Supervisor, UNM IT

- Provided technical support and troubleshooting for faculty, staff, and students in a university IT environment.
- Assisted with system administration, database management, and web application development.
- Developed internal tools using C#, SQL, and JavaScript to automate tasks and improve IT service efficiency.
- Maintained SharePoint sites and managed Windows Server environments.
- Optimized frontend performance by 30% through strategic code-splitting, lazy loading, and thorough performance testing.
